

## IFR for VFR Pilots

IFR for VFR pilots is an important subject, which is often not covered enough, here, in South Florida. Let's face it, when it is true IFR, General Aviation is not flying. However, don't find yourself in a position of flying in Florida, when the weather turns to IFR and your skills are only VFR.

From Charts to Weather, from Altitude to procedures, know what it is in front of you, and always be prepared, when the conditions of your flight suddenly changes, and you are up there, and needs to act fast.

**Directions:** From I-95 turn West, on Pine Blvd. Broward College would be on your left. With arrival, make left to main parking area, and park in area "C", for building 66.

### A message from the National FAASafetyTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.  
Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
